See a Clear, Hygienic View of Flow

With its unique O-ring seal design that minimizes traps where bacteria can build up, this sterile sight flow indicator meets ASME/BPE, USP Class VI and FDA standards. Armored housing protects the glass from impact and pipe stress.

[Learn more](#)

Rugged Teflon®-Lined Sight Flow Indicator

Get a clear view of highly corrosive chemical processes even at high pressures and at temperatures up to 500°F. Teflon lining withstands harsh chemicals and solvents known to react with metal.

Movie Trivia

Which of the following movie facts are not true?

- Rather than use computer-graphic special effects, director of *Charlie & The Chocolate Factory* Tim Burton had 40 real squirrels trained to crack nuts.
- In *Lord of the Rings: Return of the King*, actor Elijah Wood used Alka Seltzer tablets to foam at the mouth after the giant spider Shelob stung him.
- The director of *Cannibal Holocaust* faced a life sentence until he could prove to a court that his actors didn't actually get killed during the movie.

Brain Teaser

Someone stole a diamond from a hotel safe during a hypnotist convention. Police narrowed the suspects to the only five attendees who had access to the safe. As it happened, all of the suspects had been hypnotized to tell one lie. This is what they told the detective:

- Angela: it wasn't Emily; it was Bob.
- Bob: it wasn't Chuck; it wasn't Emily.
- Chuck: it was Emily; it wasn't Angela.
- Doug: it was Chuck; it was Bob.
- Emily: it was Doug; it wasn't Angela.

Each suspect told exactly one lie. Who is the thief?
